MODUL 3

No. 1

No. 2

The image displays two screenshots of a Python 3.7.0 IDE window, showing the execution of a script named `Nomor_2.py`.

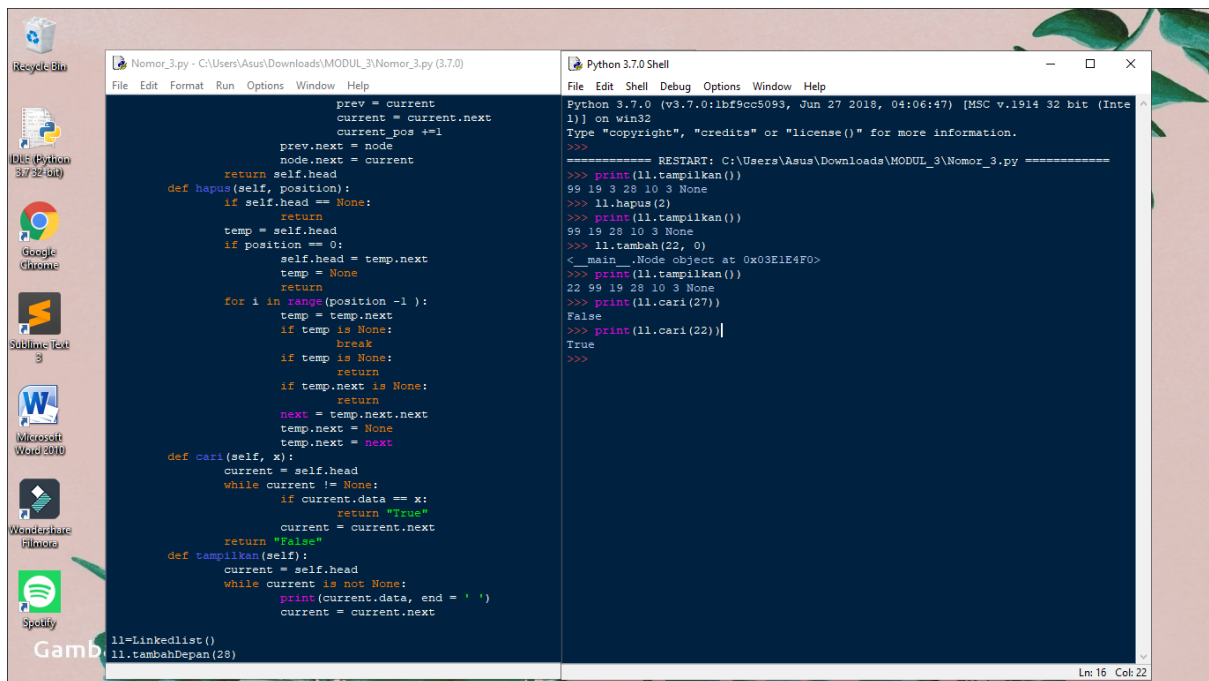

Top Screenshot:

- Left Panel (Editor):** Shows the code for `Nomor_2.py`. The code defines a function `buatNOL(n, m=None)` and calls it with `buatNOL(4, 6)` and `buatNOL(4)`. It also defines a function `buatIDENT(n)` and calls it with `buatIDENT(4)` and `buatIDENT(2)`.
- Right Panel (Shell):** Shows the output of the script. It displays the restart command, the creation of a 4x6 zero matrix, and the creation of a 4x4 zero matrix.

Bottom Screenshot:

- Left Panel (Editor):** Shows the code for `Nomor_2.py`. The code defines a function `buatIDENT(n)` and calls it with `buatIDENT(5)` and `buatIDENT(4)`.
- Right Panel (Shell):** Shows the output of the script. It displays the restart command, the creation of a 5x5 identity matrix, and the creation of a 4x4 identity matrix.
